

I pay for my satellite radio, and I deserve the right to enjoy all its services including traffic and weather. There should be no censorship on what a private service (XM) provides its paying customers (listeners).

The FCC needs to back off censorship in all areas of radio, TV, and media sources. This country respects and even encourages free speech and free enterprise. That is what XM represents.

Please do not accept the bribes of lobbyists to serve their fears and censor my radio.
